

SOIL CULTIVATION MACHINERY

GOBLE DISC HARROW

- Strong, robust and durable body structure
- Different disc options
- Hydraulic wheels
- Hydraulically adjustable disc angles
- Extensive and experienced service network
- Spare parts availability
- 2 years of warranty

Goble Disc Harrow

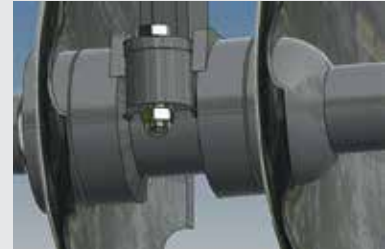

● The Hisarlar brand of goble disc harrows are towed type tillage equipment that are attached to the tractor with a draw bar. The road-work position and the disc battery angles can both be modified hydraulically. Compared to hanged type disc harrows, they require less torque.

● Hisarlar brand goble disc harrows feature battery profiles and liquid filling fittings on the main frame to increase weight as necessary.

● The working angle of both disc batteries in goble disc harrows can be changed hydraulically. The coils move at the same time and angle in the opposite direction during the adjustment, improving tillage effectiveness.

The battery shafts of Hisarlar brand disc harrows are made of 44HRC surface hardened steel.

The disc bearing housings of disc harrows are maintenance-free, lubrication-free bearings.

*Hisarlar Tarım Makineleri reserves the right to make changes to the machines without prior notice and without making changes to previously sold machines.

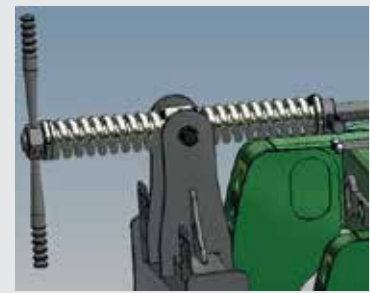

OPTIONAL FEATURES

Goble disc harrows have 61 cm diameter discs as standard. 51 cm, 56 cm and 66 cm diameter discs are optionally available.

Goble disc harrows have a rear draw bar linkage point. It is also possible to connect other wheeled equipment to the rear of the machine on the road. (roller group, etc)

It is possible to change the angle of the draw bar and the penetration depth by means of the adjustment lever in goble disc harrows.
